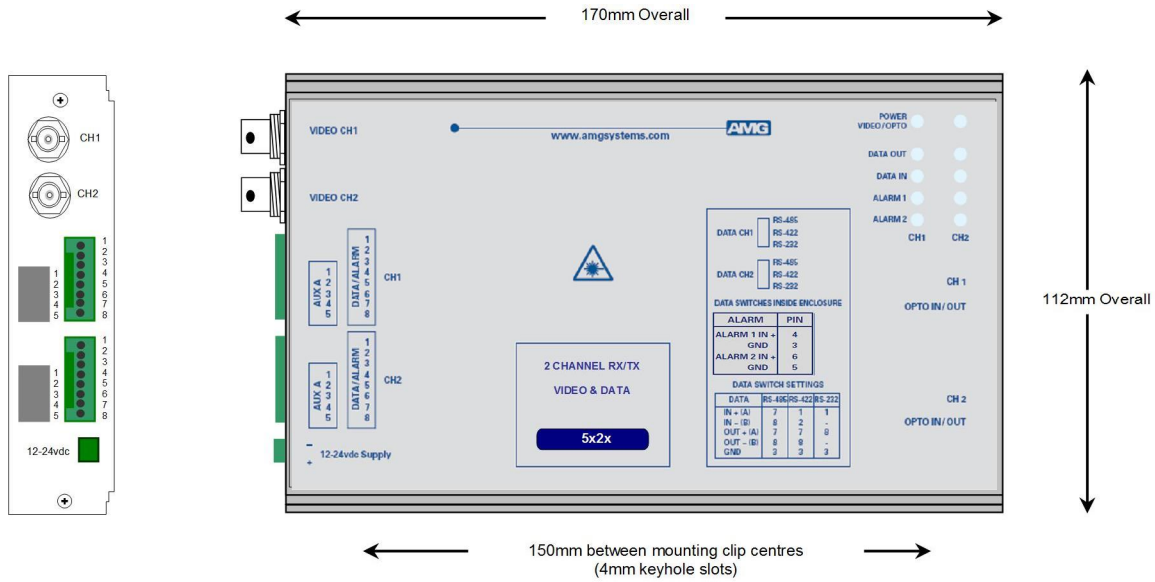
AMG5525
Instruction Manual

Dual System with 2x Independent Channels each of :

[Single Channel Video Transmit Unit with one Bi-directional Data Channel and two Uni-directional Alarms for a Singlemode Fibre Link]



The **AMG5525** is a **DUAL** rackmount system which provides two independent channels, each designed to transmit 1 video signals plus 2 Uni-directional alarms and transmit and receive 1 data signal over one Singlemode optical fibre.

The **AMG5525** is designed to be powered using an **AMG2001** standalone power supply.

The **AMG5525** is designed to operate with an **AMG5526** or rackmount **AMG5526R** dual channel video receive unit in a point to point configuration. The R suffix in the partno. indicates a rackmount configuration.

Contents

Introduction

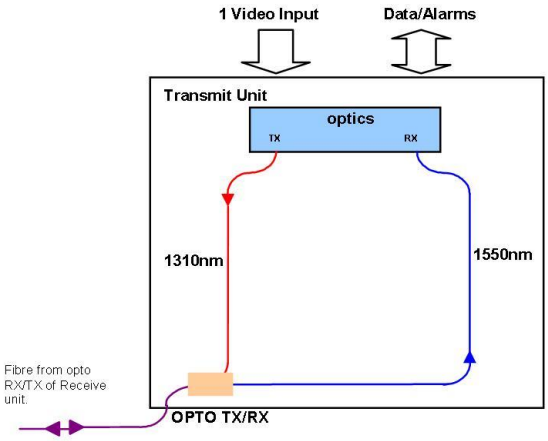
Unit Functional Schematic

The **AMG5525** provides two independent, transmit channels.

Each channel transmits 1 video plus 1 data and 2 uni-directional alarm signals to the **AMG5526** receive unit.

It also receives 1 data signals transmitted from the **AMG5526**.

The schematic diagram shows one of the two available channels of the **AMG5525**



Optical Connection

The **AMG5525** connections are illustrated in the following example which shows an **AMG5525** transmit unit together with an **AMG5526R** two channel standalone receive unit configured as a dual channel point to point system.

Connections

Video Output Connections

No. of channels..... 2 independent video channels
Connectors ..... 75 ohm BNC Socket.
Input Impedance ..... 75 ohm terminated.
Input Level..... 1 Volt p-p nominal
Frequency Response ..... 10Hz to 7MHz.

Optical Connections Singlemode

No. of Optical Connections..... 1 per video channel
Optical Fibre ..... Singlemode
Connector..... SC/PC

Primary Optical Launch Power ..... -10dBm
Transmit Wavelength 1310nm

Primary Optical Sensitivity..... -30dBm
Receive Wavelength 1510nm

Minimum Optical Dynamic Range ..... 20dB.

Power Connection

Connector Type ..... Removable 2-pin, 3.81mm, Screw Terminal
Connector Partno..... Phoenix 1803578
Supply Voltage..... +12 to +15 Volts DC
Maximum Power ..... 2.5 Watts

Data and Alarm Channel Connections

No. of Data Channels..... 1 per video channel.
No. of Alarms..... 2 uni-directional alarm per video channel

Connectors ..... Removable 8-pin, 2.5mm, Spring Terminal
Connector Partno..... Phoenix 1881383

Data Interfaces ..... RS-232, RS-422 or R-S485. Selected by slide switch inside enclosure. *See appropriate section on how to access to the data switches

Alarm inputs..... Contact Closure pull-up is 330R to +3V3

Front Panel Indicators

Power LED

Power / Video / Opto.....	Green	-	Video present & opto sync.
	R/G	-	Opto sync. but no video present.
	G/R	-	Video present but no opto sync.
	Red	-	No opto sync.
	Off	-	No power applied to unit

Low Speed Data LEDs

Data Present IN (RS485 or RS422)....	Green	-	logic zero (+V, -V) present on IN+, IN-
	Red	-	logic one (-V,V+) present on IN+, IN-
	Off	-	tri-state off or no connection on IN+, IN-
Data Present IN (RS232)	Green	-	logic zero (+V) present on input IN+
	Red	-	logic transitions present on input IN+
	Off	-	logic one (-V) present on input IN+

IN corresponds to the data signals being transmitted onto the optical fibre.

Data Present OUT (RS485 or RS422)	Green	-	logic zero (+V,-V) present on OUT+, OUT-
	Red	-	logic one (-V,+V) present on OUT+, OUT-
	Off	-	tri-state off or no connection on OUT+, OUT-
Data Present OUT (RS232).....	Green	-	logic zero (+V) present on OUT+
	Red	-	logic transitions present on OUT+
	Off	-	logic one (-V) present on OUT+

OUT corresponds to the data signals being received from the optical fibre.

Alarm LEDs

Channel 1

ALARM 1 IN.....	Green	-	Alarm ON / Contacts closed.
	Off	-	Alarm OFF / Contacts open.
ALARM 2 IN.....	Green	-	Alarm ON / Contacts closed.
	Off	-	Alarm OFF / Contacts open.

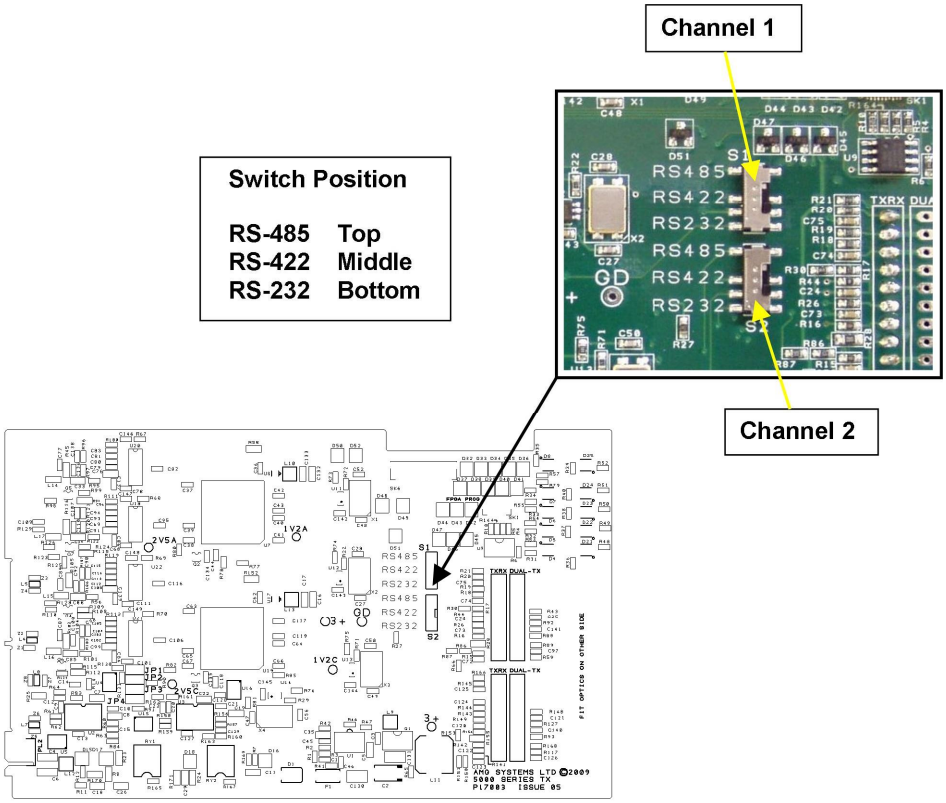
Channel 2

ALARM 1 IN.....	Green	-	Alarm ON / Contacts closed.
	Off	-	Alarm OFF / Contacts open.
ALARM 2 IN.....	Green	-	Alarm ON / Contacts closed.
	Off	-	Alarm OFF / Contacts open.

Data and Alarm Channel Configuration

he **AMG5525** transmit unit sends and receives data to/from an **AMG5526** or rackmount equivalent **AMG5526R** receive unit. The physical data interface RS-485, RS-422 or RS-232 is selectable by the user with the slide switch mounted on the main PCB inside the enclosure.

There are also 2 uni-directional alarm inputs provided for each video channel. Each alarm input is typically connected to a contact closure switch.



Data Channel Configuration

Each low speed data channel provides an RS-232, RS-422 (full duplex, four wire) or RS-485 (half duplex, two wire) interface defined by the corresponding mode switch inside the enclosure. Every data channel as shipped from the factory is set up for RS-485 operation unless otherwise requested.

The data input for both the RS-485 and the RS-422 modes detects a tri-state input condition by monitoring the differential voltage level across the input. A differential level below 600mV positive or negative will be detected as a tri-state condition. A level above 600mV positive or negative will be detected as a logic 1 or logic 0 respectively. It is important therefore to terminate the RS-485 bus or the RS-422 input bus using 120q if a pre-bias is present on the RS-485 or RS-422 bus.

A large number of third party equipment manufacturers apply a pre-bias on their RS-485 bus. This pre-bias is applied by pulling one arm of the RS-485 bus high (+5 volts) and the other arm low (0 volts) using high value resistors within the third party equipment. In order to ensure that the AMG equipment detects a tri-state condition, then these resistors should have a value above 5kq. If the third party bias resistors are less the 750q the bus can be multiple terminated as required to ensure that a tri-state level is detected.

The system detects a tri-state input condition on the data channel bus when in RS-485 or RS-422 mode.

Data Interface Connections

Data Channels 1 and 2.

Connector Pin No.	Data Channel		
	RS-485 [switch top]	RS-422 [switch middle]	RS-232 [switch bottom]
1		IN + (A)	IN
2		IN - (B)	
3	GND	GND	GND
4			
5			
6			
7	IN/OUT + (A)	OUT + (A)	
8	IN/OUT - (B)	OUT - (B)	OUT

Note: (A) or (B) in brackets in the above table refers to RS-485 / RS-422 data specification.

Alarm Channel Configuration

The **AMG5525** provides 2 uni-directional alarm / contact closure inputs for each video channel. Each alarm input is typically connected to a contact closure switch.

Each ALARM IN+ input incorporates a 330R pull-up resistor to the internal +3V3 supply.

Alarm Interface Connections

Video Channels 1 and 2.

Connector Pin No.	Alarm Interface	
	Alarm 1	Alarm 2
1		
2		
3	ALARM 1 GND	
4	ALARM 1 IN +	
5		ALARM 2 GND
6		ALARM 2 IN +
7		
8		

Physical Information

Dimensions

Height..... 112mm
Width..... 170mm (excluding connectors)
Depth..... 7HP
Weight..... 200grams

Mounting Details

The AMG unit is supplied with a clip-on mounting bracket which should be attached to a panel or wall using 2 off 4.0mm screws, see diagram on page 1 for dimensions. The unit is clipped into the mounting bracket, and is then held firmly in position.

Safety

AMG Optical Fibre Products use Class 1 laser systems in accordance with EN 60825-2:2000.

It is always advisable to follow good practice when working with optical fibre systems. This includes:

- Do not stare with unprotected eyes or with any unapproved collimating device at fibre ends or connector faces, or point them at other people.
- Use only approved filtered or attenuating viewing aids

For other safety issues and advice on good practice associated with optical fibre systems, please see EN 60825-2:2000 or your local safety officer.

Maintenance and Repair

There are no user serviceable parts within AMG products. See unit data sheet for full specification. In case of problem or failure, please call your local support centre or contact: **AMG Systems Ltd.** at 3 The Omega Centre, Stratton Business Park, Biggleswade, Beds., SG18 8QB, UK.
